

CCTV and IP Camera Solution

C o s t - E f f e c t i v e S e c u r i t y a n d N e t w o r k e d C a m e r a S y s t e m s

Omicron's surveillance solutions offer unmatched performance. We provide a fully scalable architecture coupled with cutting-edge software and precise site analysis. No matter the problem, we have a solution for your current needs—tested through years of experience and formulated by expert technicians. Omicron has transformed school districts and government agencies alike, providing seamless CCTV, wireless camera systems and full IP functionality. Our camera systems do not simply offer immediate security, they offer peace of mind from a reliable company, dedicated to nurturing positive, long-term relationships.

Commitment

Excellence

Dedication

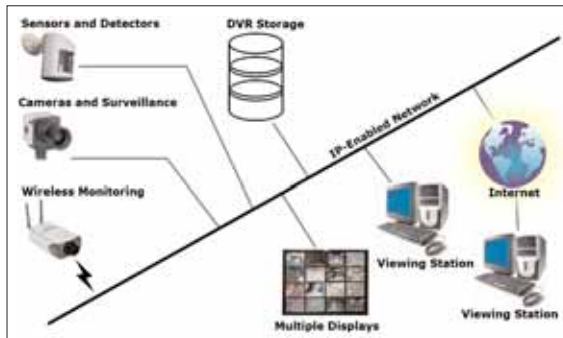

Integrity

Wireless IP-Surveillance takes two proven technologies—outdoor wireless transmission and networked video surveillance—and combines them to create a powerful solution that overcomes many of the challenges that up to now prevented end users from installing surveillance and monitoring systems: distance, lack of network infrastructure, inclement conditions and price, to name a few. Wireless IP surveillance represents an innovative breakthrough and Omicron stands ready to implement it into your business space.

Similarly, CCTV provides an easy and cost effective solution for encapsulated environments. The most widely known use of CCTV is in security systems in such applications as retail shops, banks and government establishments. There is no situation that we cannot anticipate and no situation that we cannot adapt to.

Advanced Technology Features

- Motion Detection Integration
- Control System Integration (doors controlled by cameras)
- Object Recognition (software trained to identify potential risks)
- Facial Recognition Software
- Biometric Integration

Omicron is a capable and dedicated partner. With our experience and know-how, we are able to provide surveillance solutions to any company or institution. The power of surveillance is afoot, let not this opportunity, and our expertise, go unused. Now is the time to view the world from a safe perspective.

Our Mission

Our mission is to provide quality information management systems and support in an environment that fosters positive relationships between providers, clients, and community. Omicron Technologies, Inc. envisions business, government, and community partners working together.

Our History

Omicron was founded in 1994 by a group of software developers and engineers. Our original focus was on customized solutions to the data management, IT and security problems of local small businesses, schools, hospitals and government agencies. As our experience grew, we became increasingly aware of the commonality of solutions and of the inter-networking of communities of users. Consequently, Omicron's approach to problem solving is now larger in

scope and encompasses IT outsourcing, custom hardware and software for specialized applications, safety and security infrastructure and software, advanced research and development and large-scale, nationwide projects. Current Omicron product development emphasizes web-based solutions to local and national problems. Technology management is as local or as global as is appropriate, but access to resources and support is always available.

Commitment to Excellence

Our service record is a reflection of our commitment to professionalism and community. Our web-based support systems emphasize quick, accurate solutions and operational excellence. Our onsite training, support and consulting is personal and professional, showing clients how to improve business strategies, enhance enterprise-wide performance, improve time to market, reduce costs and build profitable customer relationships.

Commitment to Community

Omicron Technologies, Inc. believes in strengthening our communities through philanthropy and direct service. Omicron is intimately involved with schools, volunteering efforts and a host of community development and outreach programs. As such, we are a major supporter of the MGR Foundation (a public 501(c)3 organization).

Through tutoring/mentoring, the informal arts, volunteering and community development, they reach many children, families and communities who need a helping hand. The MGR Foundation is dedicated to expanding and refining educational and health programs; setting new standards for success and well-being.

<http://www.mgrf.org>

Omicron believes in strengthening relationships through care, dedication and service. We feel that by reaching out to communities in need, we give back to the society that has provided us with so much support. Our commitment to community is the cornerstone of our business practices and a reflection of our spirit and integrity.

empowering, securing, and managing your enterprise
