

Verify Facility Manager

Omicron's Plant and Facility RFID Tracking Suite

Innovation, leadership, operational excellence and a dynamic workforce. Verify's RFID FM system provides innovative technology that changes the face of worksite management. It provides operational excellence by tracking all active and passive assets, both human and inert. It provides strong leadership through real-time deployment. It ensures a dynamic and fluid work force, always up-to-date and always secure.

Verify FM's RFID (Radio Frequency ID) systems are revolutionizing industry and government sectors by providing a cost-effective, low-voltage tracking and management system that allows for real-time assessment through dynamic radio frequency networks. These RF systems are embedded in ID cards, tools, supply trucks, equipment and sensitive areas. The networks constantly communicate, providing location, time and a specific ID stamp.

Security

Security is of great importance in these uncertain times. There are very few cost-effective ways to ensure security, especially when one must manage thousands of employees in many different locations. Verify's security systems allow for a low-cost solution without the need for high-cost, high-voltage GPS systems.

- All visitors are given quick temporary RFIDs
- All trucks entering a work area are tracked with a magnetic RFID with removal notification
- All equipment is monitored
- All locations are checked
- Perimeters are secured
- Lost employees are found
- Injured employees are aided
- Sensitive equipment and locations are monitored

Safety

Very often the severity of worksite accidents is magnified by delayed response. Verify offers an easy solution to monitoring all employees and eliciting emergency assistance where there is trouble. Verify's panic badges emit a help-signal to a wider area, alerting the network of a problem and even serve as location beacons for missing assets.

Verify's RFID system eliminates mistakes. Employees can switch to lunch mode or offsite mode, allowing for precise time tracking with weekly payroll linkage options. Truck movements can be managed and redeployments can happen in real time. Web-based, secure interfacing allows for constant information and consistent asset management.

Our Mission

Our mission is to provide quality information management systems and support in an environment that fosters positive relationships between providers, clients, and community. Omicron Technologies, Inc. envisions business, government, and community partners working together.

Our History

Omicron was founded in 1994 by a group of software developers and engineers. Our original focus was on customized solutions to the data management, IT and security problems of local small businesses, schools, hospitals and government agencies. As our experience grew, we became increasingly aware of the commonality of solutions and of the inter-networking of communities of users. Consequently, Omicron's approach to problem solving is now larger in

scope and encompasses IT outsourcing, custom hardware and software for specialized applications, safety and security infrastructure and software, advanced research and development and large-scale, nationwide projects. Current Omicron product development emphasizes web-based solutions to local and national problems. Technology management is as local or as global as is appropriate, but access to resources and support is always available.

Commitment to Excellence

Our service record is a reflection of our commitment to professionalism and community. Our web-based support systems emphasize quick, accurate solutions and operational excellence. Our onsite training, support and consulting is personal and professional, showing clients how to improve business strategies, enhance enterprise-wide performance, improve time to market, reduce costs and build profitable customer relationships.

Commitment to Community

Omicron Technologies, Inc. believes in strengthening our communities through philanthropy and direct service. Omicron is intimately involved with schools, volunteering efforts and a host of community development and outreach programs. As such, we are a major supporter of the MGR Foundation (a public 501(c)3 organization).

Through tutoring/mentoring, the informal arts, volunteering and community development, they reach many children, families and communities who need a helping hand. The MGR Foundation is dedicated to expanding and refining educational and health programs; setting new standards for success and well-being.

<http://www.mgrf.org>

Omicron believes in strengthening relationships through care, dedication and service. We feel that by reaching out to communities in need, we give back to the society that has provided us with so much support. Our commitment to community is the cornerstone of our business practices and a reflection of our spirit and integrity.
