Omicron's Asset Inventory & Supply Chain solutions are unmatched—our years of experience with barcode asset tracking and RFID supply chain management ensure a solution for your company. Omicron is a leader in innovative software designed to pinpoint any asset and manage its movements and locations. Omicron's Asset Inventory solutions can transform your company, erasing expensive equipment loss, insurance premiums and supply-chain mistakes. We have developed a fully realized system capable of revolutionizing the way you do business and the way you manage your company's assets. With our help, your company can maximize its potential and ensure its growth.

Omicron Technologies, Inc. has implemented a wide range of large-scale, complex asset inventory & supply chain solutions. Our understanding of the need to track precious assets fuels our targeted approach that has been so critical to our success with school districts and government agencies.

Using the latest state-of-the-art barcode & RFID technology, you'll be enabled to take accurate physical inventories quickly, get increased control over portable items and have access to reliable information for planning new fixed asset investments.

The ability to track assets from the time of acquisition until retirement is crucial for high productivity and accurate financial reporting in business. Without Omicron's asset-tracking system, asset tracking has been inaccurately performed while consuming expensive personnel resources over an extended period of time. Companies who have replaced traditional asset tags with Omicron's asset system report reductions in fixed asset inventory expense of as much as seventy-five percent, with far greater data accuracy.

Understanding and effectively managing supply-chain resources is crucial in operating any business. RFID spans the supply chain like few other technologies. By capturing more data, eliminating errors and tracking inventory throughout the supply chain, RFID revolutionizes supply-chain management.

Omicron's real-world experience delivers RFID capabilities that drive dramatic improvements in supply-chain performance.

Omicron has the experience and talent to change your business. Through RFID management and asset inventories, we are capable of reducing costs, down-time, mix-up and a host of other potentially crippling and expensive problems. Let Omicron track your way to success.

About Omicron Technologies, Inc.

A History of Dedication and Community Service

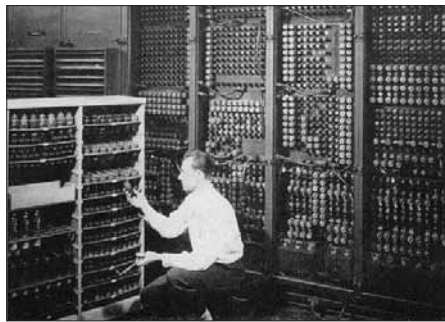

Our Mission

Our mission is to provide quality information management systems and support in an environment that fosters positive relationships between providers, clients, and community. Omicron Technologies, Inc. envisions business, government, and community partners working together.

Our History

Omicron was founded in 1994 by a group of software developers and engineers. Our original focus was on customized solutions to the data management, IT and security problems of local small businesses, schools, hospitals and government agencies. As our experience grew, we became increasingly aware of the commonality of solutions and of the inter-networking of communities of users. Consequently, Omicron's approach to problem solving is now larger in

scope and encompasses IT outsourcing, custom hardware and software for specialized applications, safety and security infrastructure and software, advanced research and development and large-scale, nationwide projects. Current Omicron product development emphasizes web-based solutions to local and national problems. Technology management is as local or as global as is appropriate, but access to resources and support is always available.

Commitment to Excellence

Our service record is a reflection of our commitment to professionalism and community. Our web-based support systems emphasize quick, accurate solutions and operational excellence. Our onsite training, support and consulting is personal and professional, showing clients how to improve business strategies, enhance enterprise-wide performance, improve time to market, reduce costs and build profitable customer relationships.

Commitment to Community

Omicron Technologies, Inc. believes in strengthening our communities through philanthropy and direct service. Omicron is intimately involved with schools, volunteering efforts and a host of community development and outreach programs. As such, we are a major supporter of the MGR Foundation (a public 501(c)3 organization).

Through tutoring/mentoring, the informal arts, volunteering and community development, they reach many children, families and communities who need a helping hand. The MGR Foundation is dedicated to expanding and refining educational and health programs; setting new standards for success and well-being.

<http://www.mgrf.org>

Omicron believes in strengthening relationships through care, dedication and service. We feel that by reaching out to communities in need, we give back to the society that has provided us with so much support. Our commitment to community is the cornerstone of our business practices and a reflection of our spirit and integrity.
