

Government Operations and Security

Omicron's Government Operations and Security Systems Solutions

Security is more than simply evading attacks and isolating critical computer systems—it is trust. Trust in the protection of your crucial assets; trust that the connections you have with customers and suppliers remain private; and most importantly, trust that your defenses are flexible, scalable, dynamically engineered and fully capable.

Omicron's Operation & Security Solutions address all aspects of the operational security to ensure total protection—from facilities and systems to people and information. With over 10 years of experience protecting commercial and government assets nationwide, Omicron has helped clients minimize and manage risk, while maximizing efficiency. Be compliant, secure your information, ensure your privacy, assure continuity and protect against fraud and attacks.

Integrity

Omicron understands the needs of government; we understand the supremely crucial role security plays in any agency's operations. With many years of experience, Omicron can supply your agency with a fully realized and technologically integrated security and operations system: from asset inventories to visitor tracking; from RFID tagging/real-time tracking to wireless security camera networks; from perimeter security to complete network encryption and data management solutions.

Omicron has been implementing security and operations solutions since 1994. Omicron's advanced software engineers solve any problem and customize dynamic solutions. Our security and tracking engineers target problems and attack them from every conceivable angle.

Omicron is the solution. Through trust and dedication, we ensure an open relationship, able to adapt and serve the specific needs of your agency. Let us secure your enterprise and manage your operations. Trust in our expertise and technical savvy to revolutionize your organization. Trust in Omicron to secure your future.

Our Mission

Our mission is to provide quality information management systems and support in an environment that fosters positive relationships between providers, clients, and community. Omicron Technologies, Inc. envisions business, government, and community partners working together.

Our History

Omicron was founded in 1994 by a group of software developers and engineers. Our original focus was on customized solutions to the data management, IT and security problems of local small businesses, schools, hospitals and government agencies. As our experience grew, we became increasingly aware of the commonality of solutions and of the inter-networking of communities of users. Consequently, Omicron's approach to problem solving is now larger in

scope and encompasses IT outsourcing, custom hardware and software for specialized applications, safety and security infrastructure and software, advanced research and development and large-scale, nationwide projects. Current Omicron product development emphasizes web-based solutions to local and national problems. Technology management is as local or as global as is appropriate, but access to resources and support is always available.

Commitment to Excellence

Our service record is a reflection of our commitment to professionalism and community. Our web-based support systems emphasize quick, accurate solutions and operational excellence. Our onsite training, support and consulting is personal and professional, showing clients how to improve business strategies, enhance enterprise-wide performance, improve time to market, reduce costs and build profitable customer relationships.

Commitment to Community

Omicron Technologies, Inc. believes in strengthening our communities through philanthropy and direct service. Omicron is intimately involved with schools, volunteering efforts and a host of community development and outreach programs. As such, we are a major supporter of the MGR Foundation (a public 501(c)3

organization). Through tutoring/mentoring, the informal arts, volunteering and community development, they reach many children, families and communities who need a helping hand. The MGR Foundation is dedicated to expanding and refining educational and health programs; setting new standards for success and well-being.

<http://www.mgrf.org>

Omicron believes in strengthening relationships through care, dedication and service. We feel that by reaching out to communities in need, we give back to the society that has provided us with so much support. Our commitment to community is the cornerstone of our business practices and a reflection of our spirit and integrity.
