

Access Solutions

Omicron's Identification card Systems and Building Access Security Suite

Omicron's building access solutions is a set of unparalleled detection, identification, isolation and containment procedures and equipment designed and developed to secure any installation and monitor all incoming traffic. Omicron is a leader in securing access points in a varied host of structures, both public and private. With more than 10 years experience, we are able to devise an accurate risk assessment and deployment plan tailored to meet your specific needs. The risks are greater now than ever. Omicron is ready to secure your institutions. Join us and strengthen your access points.

Omicron provides the cutting edge in security and access monitoring. If you simply need to monitor and track all visitors with our simple yet elegant visualization and tracking system, Omicron stands ready. If you are seeking a more comprehensive access point containment and surveillance system, Omicron stands ready. If you are seeking a premium intrusion defense system with the latest in biometric and Radio Frequency tracking, coupled with magnetic locks and roll cages and a state-of-the-art surveillance system, Omicron stands ready.

Our Mission

Our mission is to provide quality information management systems and support in an environment that fosters positive relationships between providers, clients, and community. Omicron Technologies, Inc. envisions business, government, and community partners working together.

Our History

Omicron was founded in 1994 by a group of software developers and engineers. Our original focus was on customized solutions to the data management, IT and security problems of local small businesses, schools, hospitals and government agencies. As our experience grew, we became increasingly aware of the commonality of solutions and of the inter-networking of communities of users. Consequently, Omicron's approach to problem solving is now larger in

scope and encompasses IT outsourcing, custom hardware and software for specialized applications, safety and security infrastructure and software, advanced research and development and large-scale, nationwide projects. Current Omicron product development emphasizes web-based solutions to local and national problems. Technology management is as local or as global as is appropriate, but access to resources and support is always available.

Commitment to Excellence

Our service record is a reflection of our commitment to professionalism and community. Our web-based support systems emphasize quick, accurate solutions and operational excellence. Our onsite training, support and consulting is personal and professional, showing clients how to improve business strategies, enhance enterprise-wide performance, improve time to market, reduce costs and build profitable customer relationships.

Commitment to Community

Omicron Technologies, Inc. believes in strengthening our communities through philanthropy and direct service. Omicron is intimately involved with schools, volunteering efforts and a host of community development and outreach programs. As such, we are a major supporter of the MGR Foundation (a public 501(c)3

organization). Through tutoring/mentoring, the informal arts, volunteering and community development, they reach many children, families and communities who need a helping hand. The MGR Foundation is dedicated to expanding and refining educational and health programs; setting new standards for success and well-being.

<http://www.mgrf.org>

Omicron believes in strengthening relationships through care, dedication and service. We feel that by reaching out to communities in need, we give back to the society that has provided us with so much support. Our commitment to community is the cornerstone of our business practices and a reflection of our spirit and integrity.
